

The Touchstone Wood/Gas Rough-In Fireplace

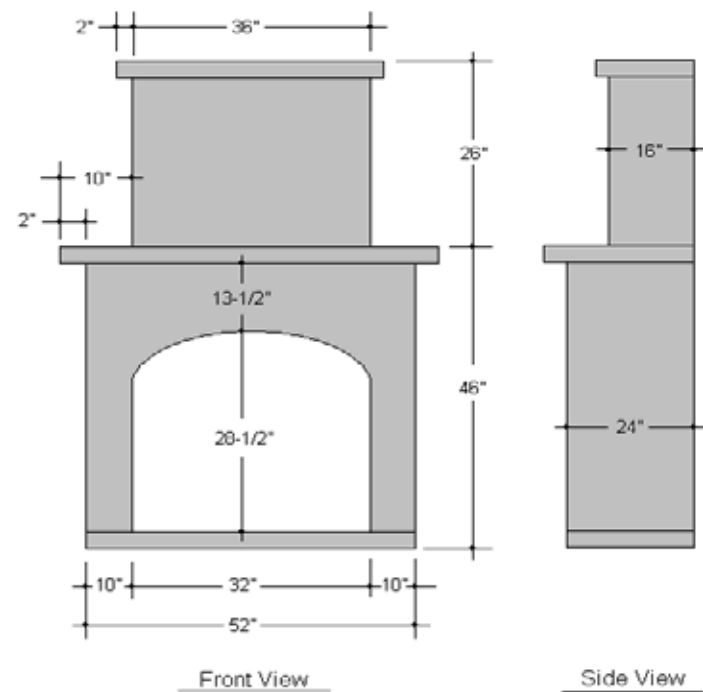

The Touchstone outdoor rough-in fireplace is the perfect addition to your outdoor living space. The fireplace design takes the guess work out of the complicated construction of a wood or gas fireplace that vents properly and allows personal options and finishes.

The fireplace tilt-up design of reinforced concrete and brick firebox (not included) can be built in a day and ready for stucco, stone, tile or any finish that compliment your taste and décor.

The fireplace is fitted with a 24ga. galvanized smoke box and flue that ensures proper ventilation.

The simple contemporary design can be changed or added to enhancing your outdoor living space creating a "one of a kind" outdoor living experience.
